

Client Requirements Checklist: Duro Design Group Website Project

To ensure the timely and successful completion of your institutional-grade website, please provide the following assets and documentation. Prompt submission of these items is crucial for adhering to the 3-week project timeline.

1. Essential Website Content & Assets

- **Company Logo:** High-resolution vector files (e.g., .SVG, .AI, .EPS) and raster files (e.g., .PNG, .JPG) for various uses.
- **Branding Guidelines:** Any existing brand style guides, color palettes (HEX, RGB codes), and typography specifications.
- **Website Text Content:** All written content for pages such as Home, About Us, Services, Projects, Contact, etc. (e.g., mission statement, company history, service descriptions).
- **High-Resolution Images:** Professional photographs of your team, office, completed projects, and any relevant stock imagery. Please ensure you have the rights to use all submitted images.
- **Video Assets (Optional):** Any promotional or project-related videos you wish to feature on the website.

2. Project-Specific Information

- **Case Studies / Project Descriptions:** Detailed write-ups and supporting visuals (photos, diagrams) for key projects you wish to showcase. This should include project objectives, challenges, solutions, and outcomes.
- **Client Testimonials:** Quotes or short narratives from satisfied clients, ideally with their name, title, and organization (with permission).
- **Service Offerings:** Comprehensive descriptions of all architecture and engineering services provided.

3. Government Documentation & Identification

To ensure the website effectively communicates your qualifications for government contracts and aligns with public sector standards, please provide the following:

- **CAGE Code (Commercial and Government Entity Code):** Your unique identifier for doing business with the U.S. federal government.

- **EIN (Employer Identification Number):** Your federal tax identification number.
- **NAICS Codes (North American Industry Classification System):** All relevant NAICS codes that describe your business activities.
- **UEI (Unique Entity Identifier):** The 12-character alphanumeric ID assigned to entities doing business with the federal government.
- **GSA Schedule Information (if applicable):** Details of any General Services Administration (GSA) Schedules you hold.
- **Certifications:** Copies of any relevant government certifications (e.g., Small Business, Woman-Owned, Minority-Owned, Veteran-Owned, HUBZone).
- **Key Personnel Resumes/Bios:** Brief professional summaries of key team members, highlighting their experience in public sector projects.

4. Access & Credentials

- **Domain Registrar Access:** If you already own a domain, access details to configure DNS settings (if required).
- **Existing Hosting Credentials (if applicable):** If you have current hosting, relevant login information.

5. Feedback & Approvals

- **Design & Content Approvals:** Timely feedback on design mock-ups and content drafts to keep the project on schedule.

We will provide secure methods for sharing sensitive information. Please gather these items at your earliest convenience to facilitate a smooth and efficient project workflow.
