

Project Proposal: Institutional-Grade Website Development for Duro Design Group

1. Executive Summary

This proposal outlines the development of a comprehensive, institutional-grade website for **Duro Design Group**. The project is meticulously crafted to reflect the firm's elite expertise in architecture and engineering for public sector and historic preservation projects. By integrating government-centric terminology and institutional language, the website will serve as a powerful tool for market dominance, ensuring high resonance with government agencies and cultural institutions. This end-to-end solution encompasses full-stack development, integrated Search Engine Optimization (SEO), and deployment within a professional 3-week timeframe.

2. Project Objectives

The primary goal is to establish a robust digital infrastructure that accurately represents Duro Design Group's capabilities. Key objectives include enhancing visibility within the public sector, providing a professional platform for showcasing high-impact case studies, and integrating SEO best practices to improve rankings for federal and local contracting opportunities. The final product will be a scalable, secure, and user-friendly platform that serves as a cornerstone for the firm's growth and credibility.

3. Scope of Work (SOW)

3.1. Website Development & Integration

The development phase includes full front-end and back-end construction. We will create a modern, professional aesthetic tailored to government standards, ensuring responsive design across all devices. The back-end will feature a robust Content Management System (CMS) for seamless updates. A critical component of this project is the integration of government-specific language and institutional terminology, ensuring the site meets the high standards expected by public sector stakeholders.

3.2. Search Engine Optimization (SEO)

Our SEO strategy involves deep keyword research focused on government contracting terms, including CAGE codes, NAICS codes, and federal identifiers. We will implement

comprehensive on-page and technical SEO, optimizing meta tags, site speed, and structured data to ensure maximum visibility for potential government clients.

3.3. Deployment & Quality Assurance

The website will undergo rigorous testing for cross-browser compatibility and security. Upon completion, we will manage the full deployment to a live server, providing Duro Design Group with a fully operational digital asset.

4. Investment & Payment Schedule

The total investment for the comprehensive website development and SEO services is **\$3,500 USD**.

Payment Stage	Amount	Timing
Initial Deposit (50%)	\$1,750 USD	Due within 48 hours to initiate the project
Final Payment	\$1,750 USD	Due upon project completion and before final handover

4.1. Payment Instructions

The initial deposit of **\$1,750 USD** should be sent via **Zelle** to the following account:

- **Recipient Number:** 540-998-9766
- **Deadline:** Please complete the transfer within **48 hours** to ensure the project remains on the 3-week schedule.

5. Timeline & Deliverables

The project is scheduled for completion and deployment within **3 weeks** of receiving the initial deposit and all required client assets.

Milestone	Timeline
Project Kickoff	Day 1 (Upon receipt of deposit & assets)
Design & Content Integration	Week 1 - 2

6. Exclusions & Optional Services

Hosting Costs: Standard website hosting is excluded from the project fee. Hosting is estimated at approximately \$50 USD per month.

Hosting & Maintenance Partnership: For clients seeking a long-term partnership, we offer a comprehensive hosting and maintenance package for **\$150 USD per month**. This includes premium hosting, regular security updates, performance monitoring, routine backups, and ongoing technical support.

7. Client Requirements

To maintain the project's velocity, Duro Design Group is required to provide all branding assets, project images, and case studies. Crucially, the following government documentation must be provided for integration:

- **CAGE Codes & UEI**
- **EIN (Employer Identification Number)**
- **NAICS Codes**
- **Relevant Government Certifications**

8. Risk Management & Consistency

Potential risks, such as delays in asset provision or technical integration challenges, will be mitigated through weekly progress checkpoints and a structured feedback loop. This ensures the project remains consistent with the agreed-upon scope and quality standards. A rollback plan is maintained for all deployment phases to guarantee website stability.

9. Next Steps

Upon acceptance of this proposal, please proceed with the **\$1,750 Zelle deposit** to the number provided. We are eager to begin building a digital presence that positions Duro Design Group for long-term market leadership.
